WHO WILL TRAIN ME?

All our FAA Certified Instructor Pilots are highly experienced. Initially, we will assign an instructor to you.

However, if for any reason you are either not satisfied with the instruction received, or you just don't "hit it off", we will pair you with another instructor.

HOW LONG DOES IT TAKE?

This is the one aspect of the training that depends on your schedule, availability and commitment. The FAA-approved curriculum is designed to allow you to get your FAA license in the minimum time, while ensuring you are safe to operate an aircraft in today's complex traffic environment. If you are able to fly 3 times a week, it will take approximately 3 months to complete the flight training.

TRAINING

GROUND

The required ground school training to pass the FAA knowledge test is a minimum of 35 hours. This can be accomplished via online individually or in-person classroom studying.

FLIGHT

Becoming an FAA licensed pilot requires a minimum of 35 hours of flight training:

- 20 hours with an instructor
- 15 hours solo flight

Most members plan on flying 40-45 hours before coming proficient.

Training hours are billed per flight.

IS IT SAFE?

USAF Aero Clubs are significantly safer than those of civilian aviation as a whole.

We have extensive safety programs for your benefit and encourage our membership to participate in monthly safety meetings.

DO I NEED SPECIAL INSURANCE?

Unlike some commercial flight schools, you are NOT required to obtain special insurance. You are automatically provided with \$1 million full coverage as part of your membership.

COURSES AND EVENTS AVAILABLE AT THE CANNON AFB - AERO CLUB

- Private Pilots Course
- RPA Conversion Course
- Rusty Pilots Course
